Personal Statement

After 7 years of experience as a Clinical Physiologist in the NHS, I am now looking to transition into a career as a Data Analyst. Over the past year, I've successfully balanced my clinical work with online courses focused on data cleaning, visualization, manipulation, and analysis. My Bachelor of Science degree has given me a strong foundation in mathematics, statistics, and linear algebra, which I have built upon by developing technical skills in tools such as MySQL, Excel, Power BI, and Tableau. I am continually expanding my portfolio with projects using these tools, as well as Python and R. I am eager to further develop my expertise and contribute to meaningful, data-driven projects.

Skills

Technical

Descriptive statistics ● Hypothesis testing ● Regression analysis ● Excel ● MySQL ● Power BI ● Tableau ● Google Analytics ● Python ● R ● AWS Quicksight

Soft

Organisation ● Time management ● Analytical ● Critical thinking ● Creative ● Excellent communication ● Adept learner ● Bilingual
